* TO DISCARD FRECKLES,
* TAN, PIMPLES, WRINKLES

The use of creams containing animal substance sometimes causes hair to grow. You run no risk of acquiring superfluous hair when you use ordinary mercurized wax. There is nothing better for a discolored skin, as the wax actually absorbs the offensive cuticle. The latter is naturally replaced by a clear, smooth, healthy complexion, full of life and expression. It is the sensible way to discard a freckled, tanned, over-red, blotchy or pimply skin. Get an ounce of mercurized wax at any drugist's and apply nightly like cold cream, erasing in the morning with soap and water. It takes a week or so to complete the transformation.

The ideal wrinkle remover is made by dissolving an ounce of powdered kaolin in a half pint witch hazel. Bathing the face in the solution brings almost instantaneous results.

Republicans Organize For Hughes Campaign

Dallas, Ore., Sept. 5.—The Republican county central committee of Polk county has been completely organized, and active campaigning will begin this month. The members of the executive committee are: D. M. Hampton, of Monmouth; C. L. Bratcher, of Perrydale; D. E. Fletcher, of Independence; J. J. Thurston, of Saver, and C. A. Parks, of Brush College. L. V. Macken, of Monmouth, was chosen as secretary.

The committee in all precincts take active interest in their work, and the Woman's Auxiliary, composed of a leading Republican or Progressive woman in each precinct, promises to be of material assistance in the coming campaign.

The campaign this year will be directed largely by the chairman and secretary of the county central committee and the state and congressional committees. J. C. Talbot, of Falls City, the chairman of the committee, plans giving much time to the actual work. Secretary Macken was formerly a teacher, but is now in the hotel business at Monmouth. His selection meets with popular approval. Walter L. Toole, Jr., state committeeman, has served in that capacity for several years, and is closely identified with the state campaign. E. E. Paddock, of Independence, congressional committeeman for the past four years, will have direct charge of Mr. Hawley's campaign in Polk county.

A series of 15 old-time political meetings will be held in the various parts of the county. The women particularly are showing much interest in the coming contest.

ARE MEDICINES LIQUORS?

A certain class of prejudiced and jealous doctors call patent medicines only alcoholic beverages. They tell you that such and such a medicine contains as much alcohol as a glass of beer or a certain quantity of whiskey; but they do not mention that the beer or whiskey is swallowed at one draught, while only a small quantity of the medicine is taken at one dose. At the same time they will use alcohol quite as freely as many in four or five times as great proportions in their own prescriptions.

Such standard remedies as Lydia E. Pinkham's Vegetable Compound use barely enough alcohol to preserve the root and herb extracts; too little to have injurious effects; and the medicine can be had, if desired, in a non-alcoholic form.

He visited Silverton years ago and is known by many of the pioneers of this city.—Silverton Tribune.

Fruitland Notes

(Capital Journal Special Service.)
Fruitland, Sept. 5.—Don't forget to water the little birds these dry days, you who live away from a stream of water. These small creatures are among your best garden friends, helping to rid it of the insect pests. Put a large chip or piece of bark in a tub or other receptacle for water to act as a float. Yes, water the birds in summer and feed them in winter.

Kentucky may boast of its fast women, its famous waiskeys and its fast horses. Fruitland cares naught for these two last but we have a lassie or two here who stand every inch of six feet barefooted! Just think of two yards of feminine loveliness!

The types made me state last week that the Ransom barn will hold 23 tons of loose hay. Just read the figures from right to left and you have it corrected—32.

The rain and wind Saturday p. m. prostrated some of the standing corn, and this in about 20 minutes. No damage. Mr. Martin reports some losses among his prune trees. Begins picking Tuesday.

One day last week Frank Eggle while at the Merchant place, where hay was being baled, had his wheel stolen. In a day or two it was located in Salem but minus the saddle.

A part of the Boettcher family is still quarantined. Scarlet fever.

AMERICAN-MEXICAN COMMISSION MEETS

Secretary Lansing Outlines Scope of Work—First Session This Afternoon

New York, Sept. 4.—A permanent, not merely a temporary solution of the border problem is sought by this government through the meetings of the American-Mexican commission, appointed to discuss the general points of controversy between the two countries, Secretary of State Lansing told the commissioners here today.

Addressing the Mexican and American representatives at lunch, Lansing declared:

"To reach such a settlement, one that will be lasting and sure, it will be necessary to go to the root of the matter, to consider international rights and duties and to discuss the relation of the individual to the state as well as the relation of the state to the individual, subjects fundamental to social order and to the intercourse between enlightened governments."

Lansing urged that the commissioners of both countries enter their meetings in a spirit of frankness, trust and sympathy.

Most of the conferences between the American and Mexican commissioners are to be held on the presidential yacht Mayflower. The yacht is now in New York harbor and is understood to have been ordered to be ready to sail for New London on Wednesday. Reservations have been made at the Griswold hotel, New London, for the commissioners.
